Every screen. One coherent experience.

Executive summary

A complete visual reference for building the healthcare guidance demo in Sites. The package preserves the original 24 screen IDs and routes, shows desktop and mobile layouts, and defines connected journeys using fictional data.

24
unique screens

57
screen and state images

6
connected demo scenarios

Use this package in Sites

01 Review the visual catalogue

Each screen has stable identity and a corresponding source route.

02 Open the interactive HTML

Explore normal navigation or use the bottom screen selector for isolated previews.

03 Attach the package and paste the build prompt

The prompt defines mock behavior, architecture, exceptions and acceptance checks.

HealthGuide is a working name. No live AI, real patient records, doctor directory or HP ZGX connection is included. This is the mock phase of the planned product.

The visual language and connected journey

Primary blue

Completion teal

Ink

Warm attention

Soft violet

White cards, 16-20px corners, restrained shadows and generous spacing. Desktop uses a workspace sidebar; mobile uses a compact menu and a single content column. The PNGs are rendered from the same CSS and interaction reference.

Start and context

A01-A04 / Consent, profile, concern, records

Question and review

A05-A06 / Up to 10 issued prompts

Guidance and evidence

A07-A08 / Fixed scenario result

Urgent or unsupported

A15-A16 / Interrupt routine flow

Care navigation

A09-A11 / Filters, matches, provider

Summary and continuity

A12-A14 / Export, history, data controls

Demo studio O01-O03

Open scenario selection, simulated runtime and control evidence. Public pages W01-W05 explain the experience, healthcare value, privacy and help. These surfaces remain accessible to every demo visitor.

How it works For healthcare Privacy Help Try the demo

A CLEARER PATH TO CARE

Your concern. Your context. Your next step.

Explore a guided health conversation that turns your questions into clear next steps and suitable care options.

Try a sample consultation → See how it works

No account needed. Use fictional examples throughout.

01 Tell your story
A concern, a little context, and optional records.

02 Answer what matters
Up to 10 questions, tailored to the demo pathway.

03 Make your next move
Understand guidance. Compare care. Prepare a summary.

Up to 10 questions
Focused, one at a time

Explained next steps
Context and uncertainty visible

Care that fits
Specialty, distance and preferences

Designed for local AI
Future deployment on one HP ZGX

↗ **For patients**
Less confusion about where to go next.

◇ **For care teams**
Better prepared conversations and intake.

◈ **For healthcare leaders**
A practical view of local AI workflows.

INTERACTIVE DEMO · Fictional data · No live AI or medical assessment

HealthGuide

How it works | For healthcare | Privacy | Help | Try the demo

HOW IT WORKS

A little context. A clearer next step.

A guided experience you can explore in a few minutes.

01

Describe the concern

Choose a fictional scenario, review Jordan’s profile and optionally attach a sample record.

02

Answer relevant questions

Explore open answers, choices and a scale. You can skip or say you are not sure.

03

Explore the next step

Review illustrative guidance, compare fictional doctors and create a visit summary.

A THOUGHTFUL CONVERSATION

“Has the pattern changed?”

- Improving
- About the same
- Worsening
- Not sure

Each answer becomes part of a reviewable summary. An urgent scenario interrupts this flow.

You stay in control

- Review facts before continuing
- See what is unknown
- Change preferences explicitly
- Reset the entire demo at any time

FOR HEALTHCARE CIOS AND CTOS

Better navigation. More useful care capacity.

Explore the potential value for patients, care teams, health systems and insurers.

Appropriate first destination

Relevant specialty matching may reduce misdirected visits and referral rework.

Measure: appropriate-first-destination rate.

Less avoidable workload

Suitable guidance and prepared summaries may reduce unnecessary visits and repeated intake.

Measure: net clinical minutes per episode.

Lower avoidable spending

Better navigation may reduce total episode cost for insurers and risk-bearing providers.

Measure: adjusted episode cost and quality.

THE TECHNICAL STORY

One local HP ZGX. An observable workflow.

Planned architecture keeps inference, records and case state on the device, with controlled public retrieval.

This browser demo uses bundled fixtures. No device or live model is connected.

Explore the demo studio →

Outcomes need evidence

Avoided visits	**Not measured**
Insurer savings	**Not measured**
Clinical time recovered	**Not measured**

The demo shows interactions. A real pilot must measure safety, quality, access and cost together.

HealthGuide

• SAMPLE ONLY

Appointment preparation summary

Jordan Taylor · Case demo-001 · Revision 1

Reported concern

I have recurring headaches after long workdays. I would like to understand the next step.

Confirmed context

Age: 38. Medications: Not reported. Allergies: Unknown.

Answers and uncertainties

10 responses recorded. 0 skipped or unknown answers. Record fact: None confirmed.

Questions to discuss

- What additional context would be useful?
- What would the next appropriate step be?
- What changes should prompt another contact?

Fixed demonstration content. No medical assessment, diagnosis or clinical source verification. Do not use for real care.

Consultation / Urgent interruption A15 · Guest demo

URGENT PATHWAY DEMONSTRATION

This example needs urgent action.

The urgent scenario stops routine guidance and doctor matching.

- Routine flow interrupted
- Scripted example

Do not continue the routine intake.

This is a fictional urgent-signal screen. In a real emergency, contact local emergency services. The demo cannot assess symptoms or dispatch help.

US emergency number: **911**. The button below only simulates the contact action.

Preview emergency contact

No diagnosis, routine result or provider ranking is shown for this urgent case.

This case needs another path.

The selected example is outside the supported demo experience.

↗

We cannot provide a result for this example.

Unsupported scope or declined eligibility leads here. The demo does not invent an answer. A real service would provide a reviewed alternative pathway.

Review help and limitations
